

CopterPIX has a strong track record providing high-performing and reliable multi-rotor drones for variety of applications including military/commercial use. Our Drones performed complex missions in fully operational and challenging conditions.

CopterPIX drones deliver AT LEAST 30% longer flight-time / heavier payloads than ANY commercial platform, easily integrate 3rd-party applications. All made possible by world-class team w/high-end proprietary technology.

The drones range from 150gr to 50kg MTOW, as following:

ERE95/ERE1000 family, include **ERE-95 Mini-Series** drones for long-range inspection missions (up to 120min endurance); **ERE-95/1000 Series** hexa-rotor, fully redundant multi-purpose drones payloads up to 20kg and **ERE-95/1000 Hybrid** series offer hybrid generator kit (mid-air stop/start for low-noise missions) enabling **5.5 hours** endurance.

CopterPIX develops the world's 1st **Hybrid Parallel drone** which carries 25Kg for 50Km, 100Kg for 100Km (Q2/2025 commercial sales begins).

Our revolutionary **APS300** Autonomous Patrolling System, using unregulated micro-drones w/small mobile docking nests provides 24/7 patrolling for perimeters up to 5km.
