

Gadfin develops fast, hydrogen-powered drones with a quiet signature for long-range B2B drone deliveries and preventative maintenance missions. Our patented technologies redefine delivery capabilities in terms of flight radius (300Km), safety, Airworthiness, reliability and automation. Gadfin's drones range from 10-150Kg PLD carrying capability, thus enabling effective, fast delivery of supplies to remote areas at low cost. Gadfin has the biggest orders backlog in the industry, with more than \$400M all over the world.
