FlightOps

Enabling a Scalable Drone Economy

FlightOps is a leading technology company specializing in the automation of unmanned aerial systems (UAS). Founded by experts in aerospace engineering, AI, and autonomous systems, FlightOps leverages cutting-edge AI algorithms and advanced automation techniques to revolutionize UAS operations. Our platform enables full automation of the flight process, enhancing safety, compliance, and scalability. With extensive real-world experience, including over 90,000 commercial flights in 2023, and technology implemented in major operations like Walmart's drone delivery, as well as partnerships with industry giants like Qualcomm, FlightOps sets the standard for reliability and innovation in the unmanned aviation market.
